CLINICAL GUIDE FOR WINTER SUPPORT

Herbalis officina
"The best herbs for colds and flu are the ones that help you prevent them."

Shorter days and dropping temperatures can pressure to the respiratory system.

Colder air, dry indoor environments and more time spent outside create ideal conditions for infections like flu, and flu bronchitis.

Support respiratory and immune health with herbs with clinically effective lipid herbal extracts. Offering high bioavailability and resulting in preventative and acute care.

Featured Elixirs

Fast Fever Elixir

A stimulating and immune-boosting winter tonic that's best for prevention or acute support.

Ingredients:

- 1oz. rose-elder oil vinegar
- 1oz. cap raw honey
- 500mg. Garlic extract
- 500mg. Horseradish extract
- 400mg. Thyme extract
- 200mg. Cayenne extract
- 200mg. Cayenne extract (adjust to taste)

Method:

Shake and/or massage to bring a spasm, remove from heat, add extracts, seal and wait, before use. Store in a cool, dark place for up to a year.

Dose:

Maintenance: 10ml, daily

Acute: 10ml, every 3-4 hours during infection

Prevention remains the best medicine.

Immunomodulating herbs such as **Astragalus**, **Reishi**, **Witchhaz** and **Echinacea** help build resistance over time, particularly in patients recovering from stress or recurrent infections.

At the first sign of illness search for immune stimulating herbs such as **Astragalus**, **Echinacea** and **Elderberry** to reduce severity and duration.

»

When symptoms such as **Headache**, **Throat**, **Headaches** and **Fatigue** begin, consider targeted symptomatic relief.

»

Don't forget recovery! **Nettle**, **Ciss**, **Green**, **Azela** and **Ginger** help support the cycle of strength and prevent relapse.
