

Strengthening the New Zealand Curriculum and Te Marautanga o Aotearoa

We are strengthening Aotearoa New Zealand's national curriculum to ensure it is knowledge-rich, grounded in the science of learning and internationally comparable – enabling all learners to benefit from a world leading education.

We have developed this implementation timeline to give you a picture of the key curriculum, assessment and aromatawai changes taking place between 2024 and 2030. The timeline highlights what we're doing to strengthen curriculum, teaching, assessment and aromatawai in Aotearoa New Zealand, and provides visibility of the different ways we'll support you to implement these changes. We will regularly update this timeline each term.

The timeline is organised into five strands, reflecting the different workstreams that make up the curriculum, assessment and aromatawai changes. This shows how the changes across each stream of work are connected and will work together to ensure we can successfully deliver and implement quality curriculum, teaching practice, and assessment and aromatawai in our schooling system.

Clearer curriculum

This strand details the work being done to make The National Curriculum clear about the learning that cannot be left to chance. This includes when learning areas and wāhanga ako are released and when they are planned to become required for use.

Consistent practice

This strand includes the work being done to make sure that students and ākonga across the country have access to the same high-quality teaching and learning. This includes the introduction of structured teaching approaches for English, Te Reo Rangatira, Mathematics and Statistics and Pāngarau.

Strengthened assessment and aromatawai

This strand includes the work being done to provide students, ākonga, teachers, kaiako, parents and whānau with a consistent measure of student and ākonga progress to support teaching and learning. This includes the use of tools and more consistent assessment, aromatawai and reporting.

Strengthened student support

This strand includes the work being done to make sure students are progressing in line with curriculum expectations, and the additional support that is available and accessible for students who need it.

Strengthened professional support

This strand includes the work being done to make sure that teachers, kaiako and leaders are supported with the tools, skills, and knowledge needed to confidently implement change and embed new practices.

To see a list of what's changed since the last version of this timeline, visit the Implementation Supports page on Tāhūrangi:
